**Subject:** MS Settlement.

I find that I am outraged over the purposed settlement with MS.  
There are too many loop holes. And as I read it... It's in favor of MS.  
I feel that many of the terms in the document will actually help  
Microsoft keep control of their monopoly.

I also feel that the persons in charge of the proceedings are not  
qualified to stand in judgment of Microsoft and lack a basic  
understanding of how Microsoft has conducted it's self in regards to  
crushing competition. Also there does not seem to be any understanding  
of how Microsoft has used proprietary protocols to lock out NON  
Microsoft client software.

Thank you,
